

# Architetture a Microservizi con DAPR e Azure Container Apps

Alessandro Melchiori - @amelchiori  
**CodicePlastico**

A silhouette of a person sitting in a meditative pose on a dark, rocky outcrop. The person is centered in the lower half of the frame. Above them, a red speech bubble points towards their head. The background is a vast, open sky with scattered, light-colored clouds, suggesting a dawn or dusk setting. The overall mood is contemplative and serene.

Did you say "microservice"?

amazon.com®

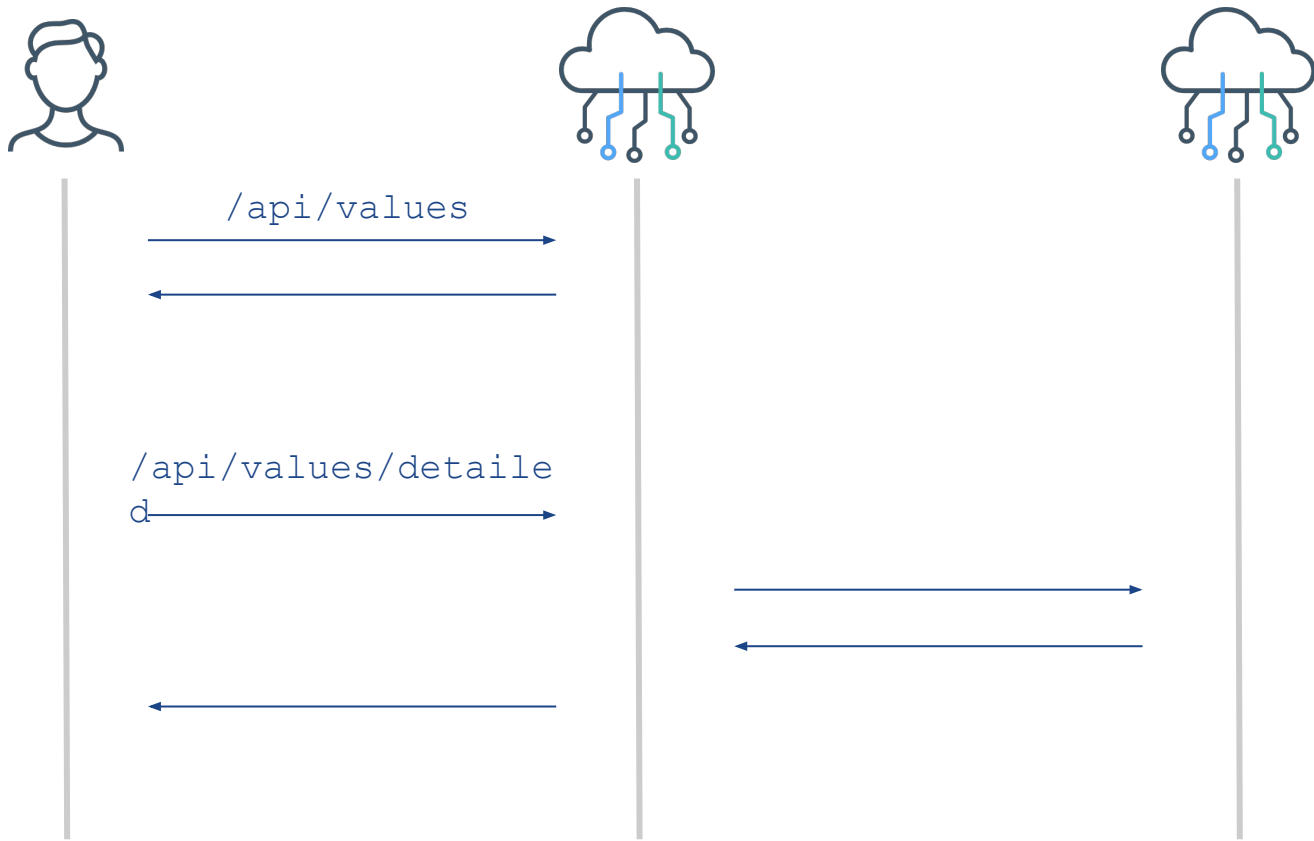

NETFLIX

With the network of microservices - service-to-service communication can become challenging

Instead of trying to prevent failures altogether, the goal is to **minimize the effects of a single** failing component.

**DEMO**

# DAPR 101

## Application code

Microservices written in

Any code or framework...

HTTP API

gRPC API

Service-to-service invocation

State management

Publish and subscribe

Resource bindings and triggers

Actors

Observability

Secrets

Configuration

Distributed Lock

## Any cloud or edge infrastructure

virtual or physical machines

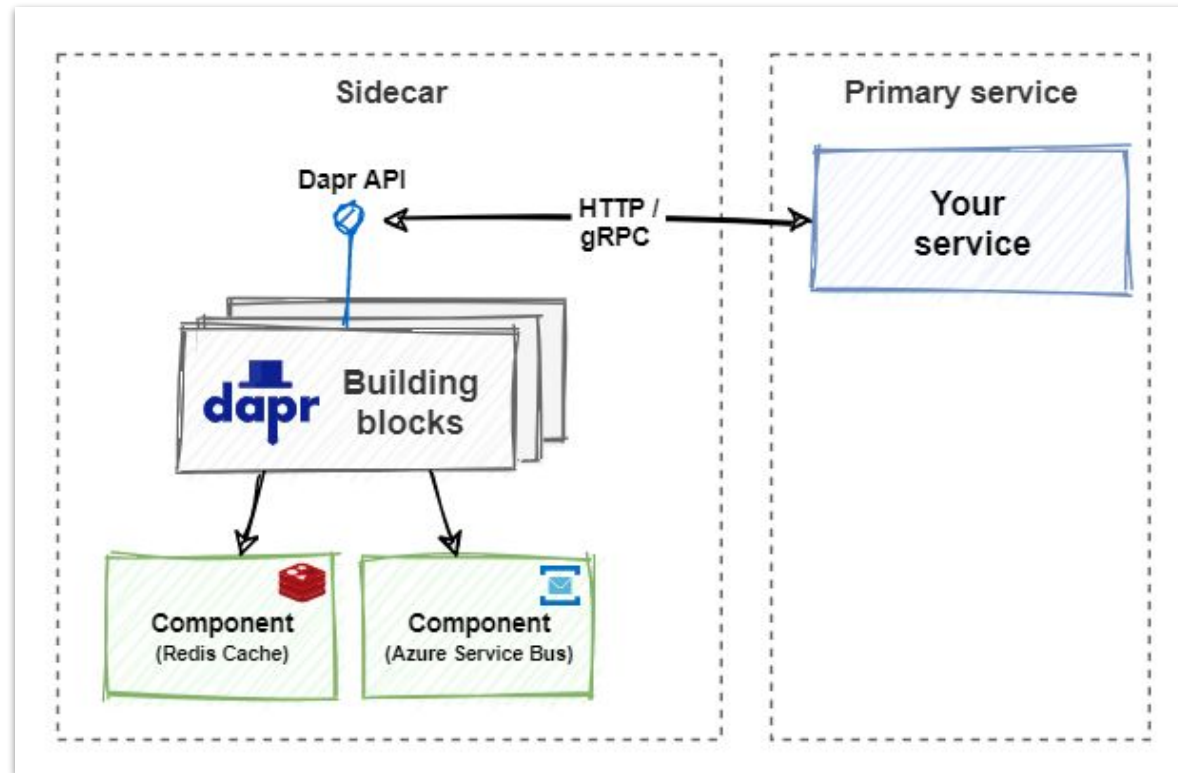

## SIDECAR PATTERN

The sidecar pattern consists of a main application plus a helper container with a responsibility that is essential to your application, but is not necessarily part of the application itself.

# DAPR as a sidecar

**DEMO**

# Azure Container Apps

**Kubernetes...  
...what else?**

# Features

Support for a **variety of application types**, including HTTP APIs, microservices, event processing, and background tasks

**Flexibility** to write code using your language, framework, or SDK of choice

Robust **autoscaling** capabilities based on HTTP traffic or event triggers

Simple **configurations** to perform modern application lifecycle tasks

**FULLY MANAGED SERVERLESS CONTAINER SERVICE FOR BUILDING AND DEPLOYING MODERN APPS AT SCALE**

**DEMO**
