Create beautiful, interactive dashboards.

- Add rich interactivity like filters, drill downs, zooming, and more
- Blazing fast navigation
- Accessible on any device
- Data Refresh
- Publish to everyone with a click

The Amazon QuickSight Difference

Cloud native = No servers = Auto-Scale

No servers or software to manage, maintain, deploy. Start with 10s of users and scale to 10s of 1000s

Fully Integrated w/AWS

Build end-to-end analytics in AWS. Secure private VPC access, Fine-grained access control, ML integrations

Secure and Global

End-to-end encryption. Native High Availability. 10 Global regions. HIPAA, PCI, ISO, SOC and FedRamp eligibility

Easy to develop and maintain

Design with QuickSight, integrate with APIs. Secure data with row-level security and authenticate seamlessly via SAML SSO

Fast, consistent performance

Fast, predictable performance for every time. Concurrent users or increased interactions do not slow down the system.

ML-insights

Contextual, relevant insights with ML-powered anomaly detection, forecasting, alerts and customizable narratives.

Insights for Everyone

Provide access to all users, pay only for usage. No upfront costs, no charges for inactive users

Customize and Embed

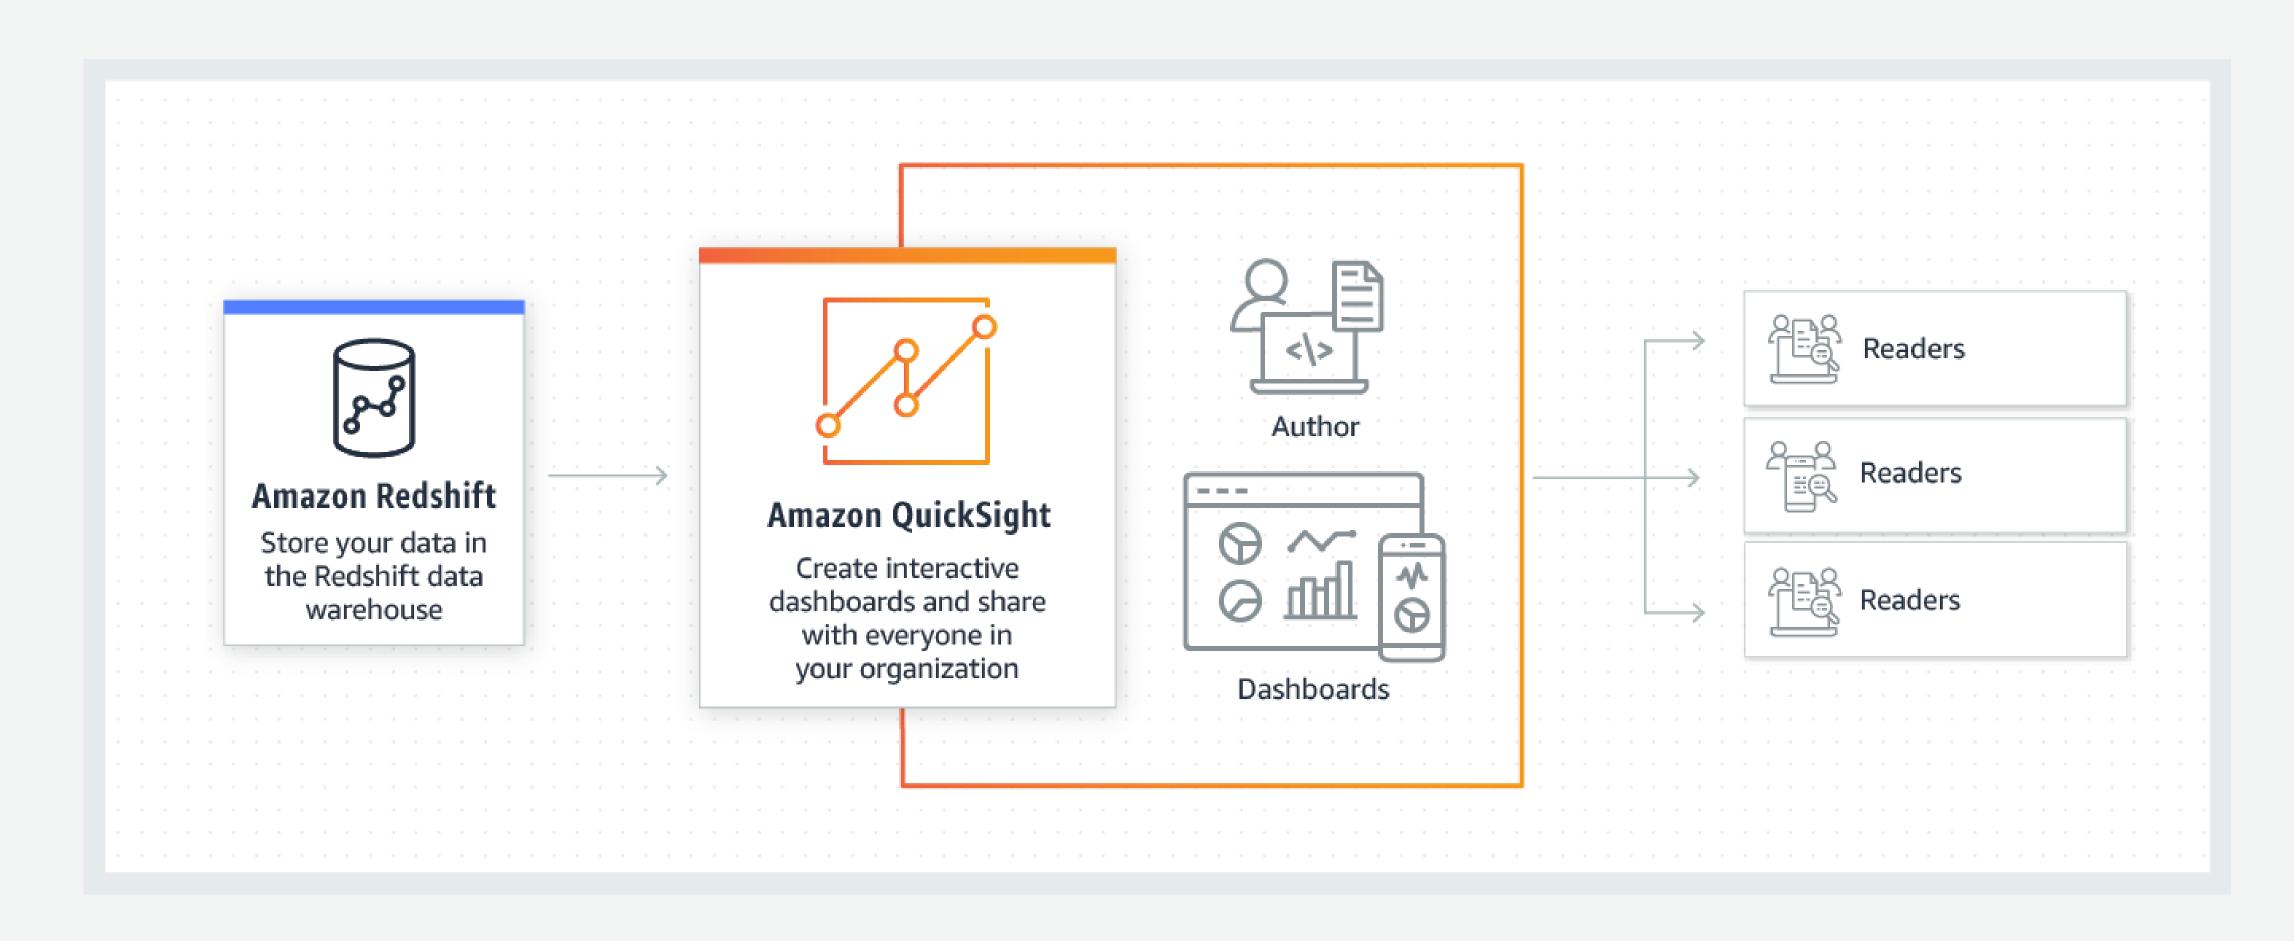

Embed into applications and enable analytics in hours, not months or years. Use themes to match application/corporate branding.

ADMINISTRATOR

END-USER

How QuickSight Works

QuickSight allows you to connect to your data sources, and create dashboards that can be securely shared across your organization.

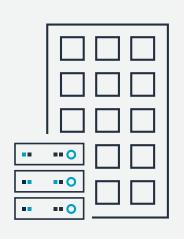

Connect to your data, wherever it is

QuickSight is natively integrated with AWS data sources, as well as on-premises and hosted databases and third party business applications

On-premises

Securely connect to on-premise databases and flat files like Excel and CSV

In the cloud

Connect to hosted database, big data formats, and secure VPCs

Applications

Connect directly to third party business applications

- Excel
- CSV
- Teradata
- MySQL
- SQL Server
- PostgreSQL

- Redshift
- RDS
- S3
- Athena
- Aurora
- Teradata
- MySQL

- Presto
- Spark
- SQL Server
- Postgre SQL
- MariaDB
- Snowflake
- IoT Analytics

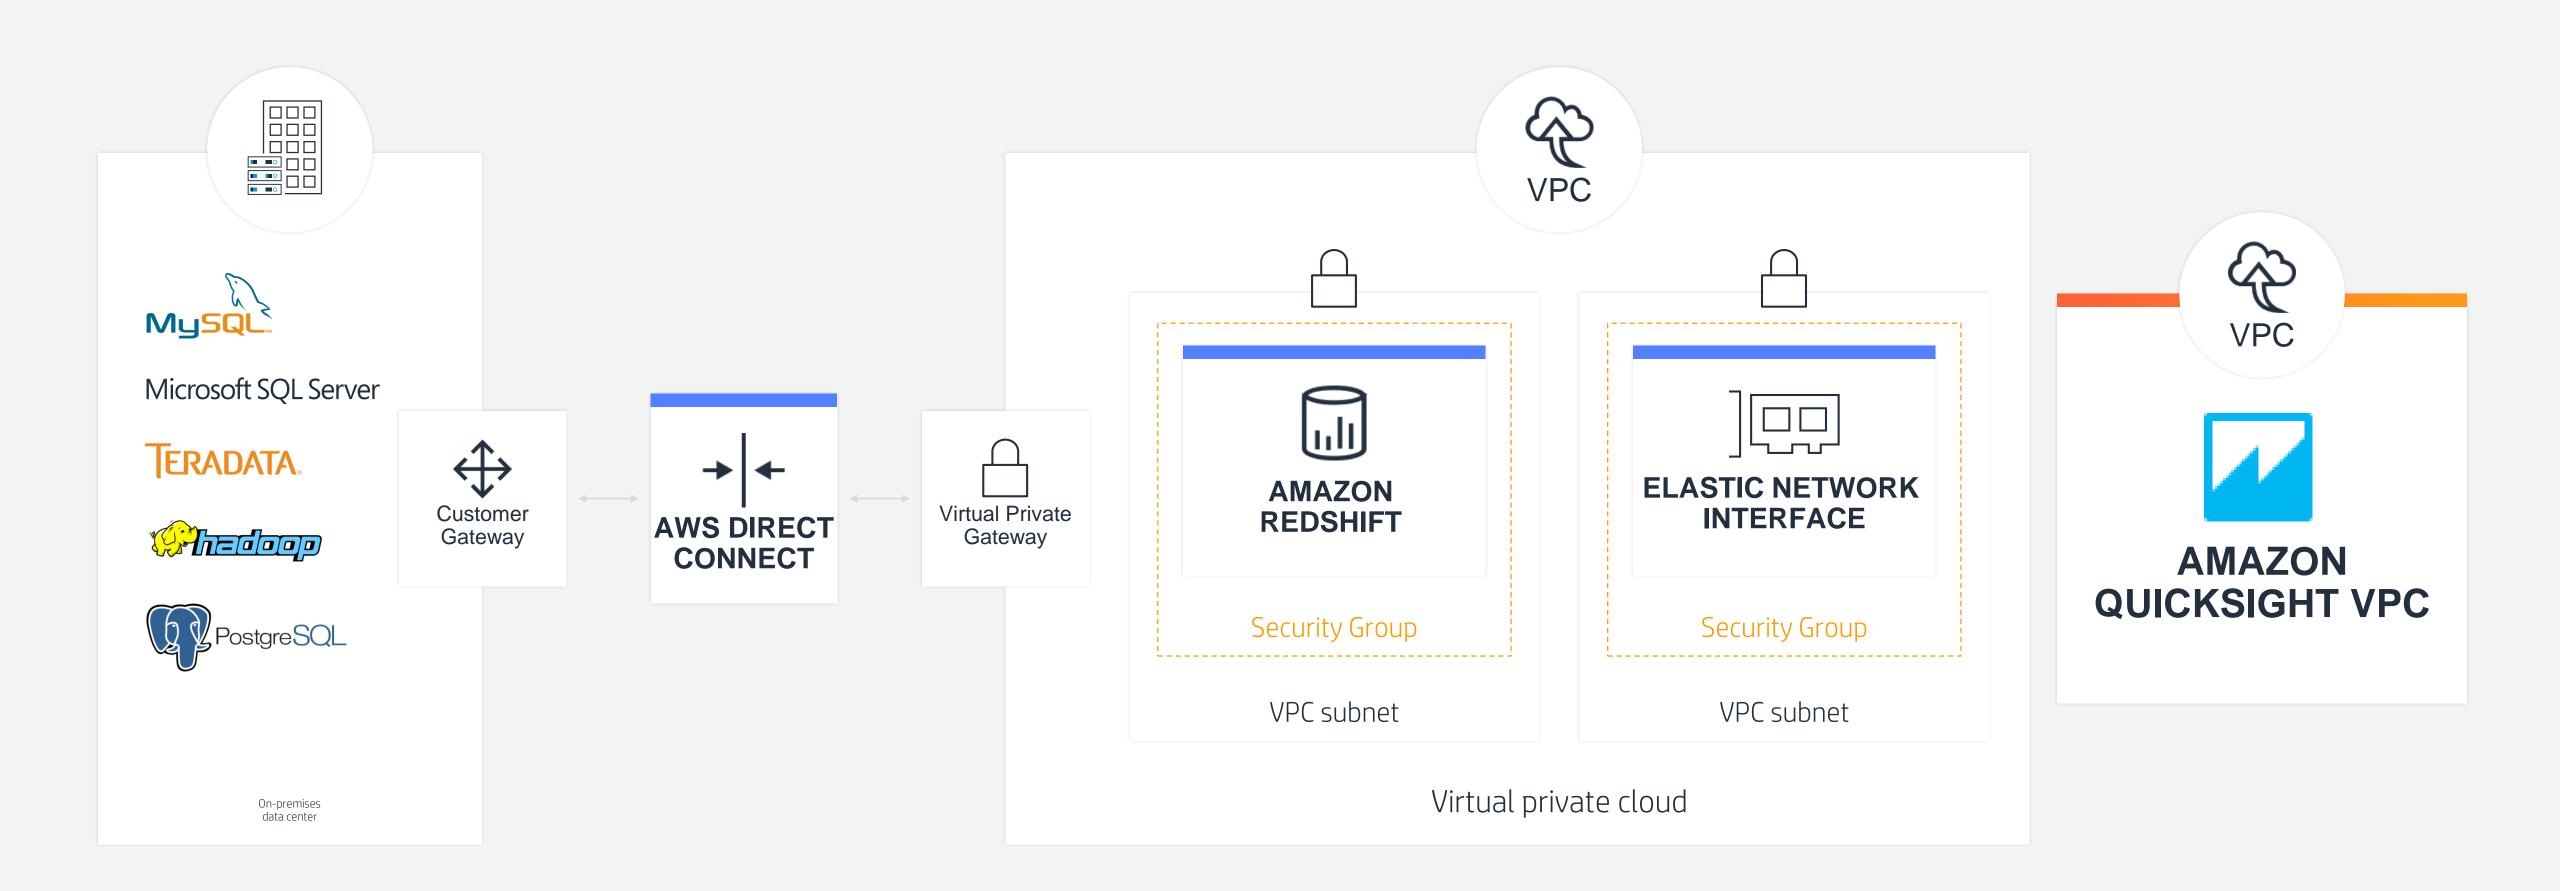

- Salesforce
- Square
- Adobe Analytics
- Jira
- ServiceNow
- Twitter
- Github

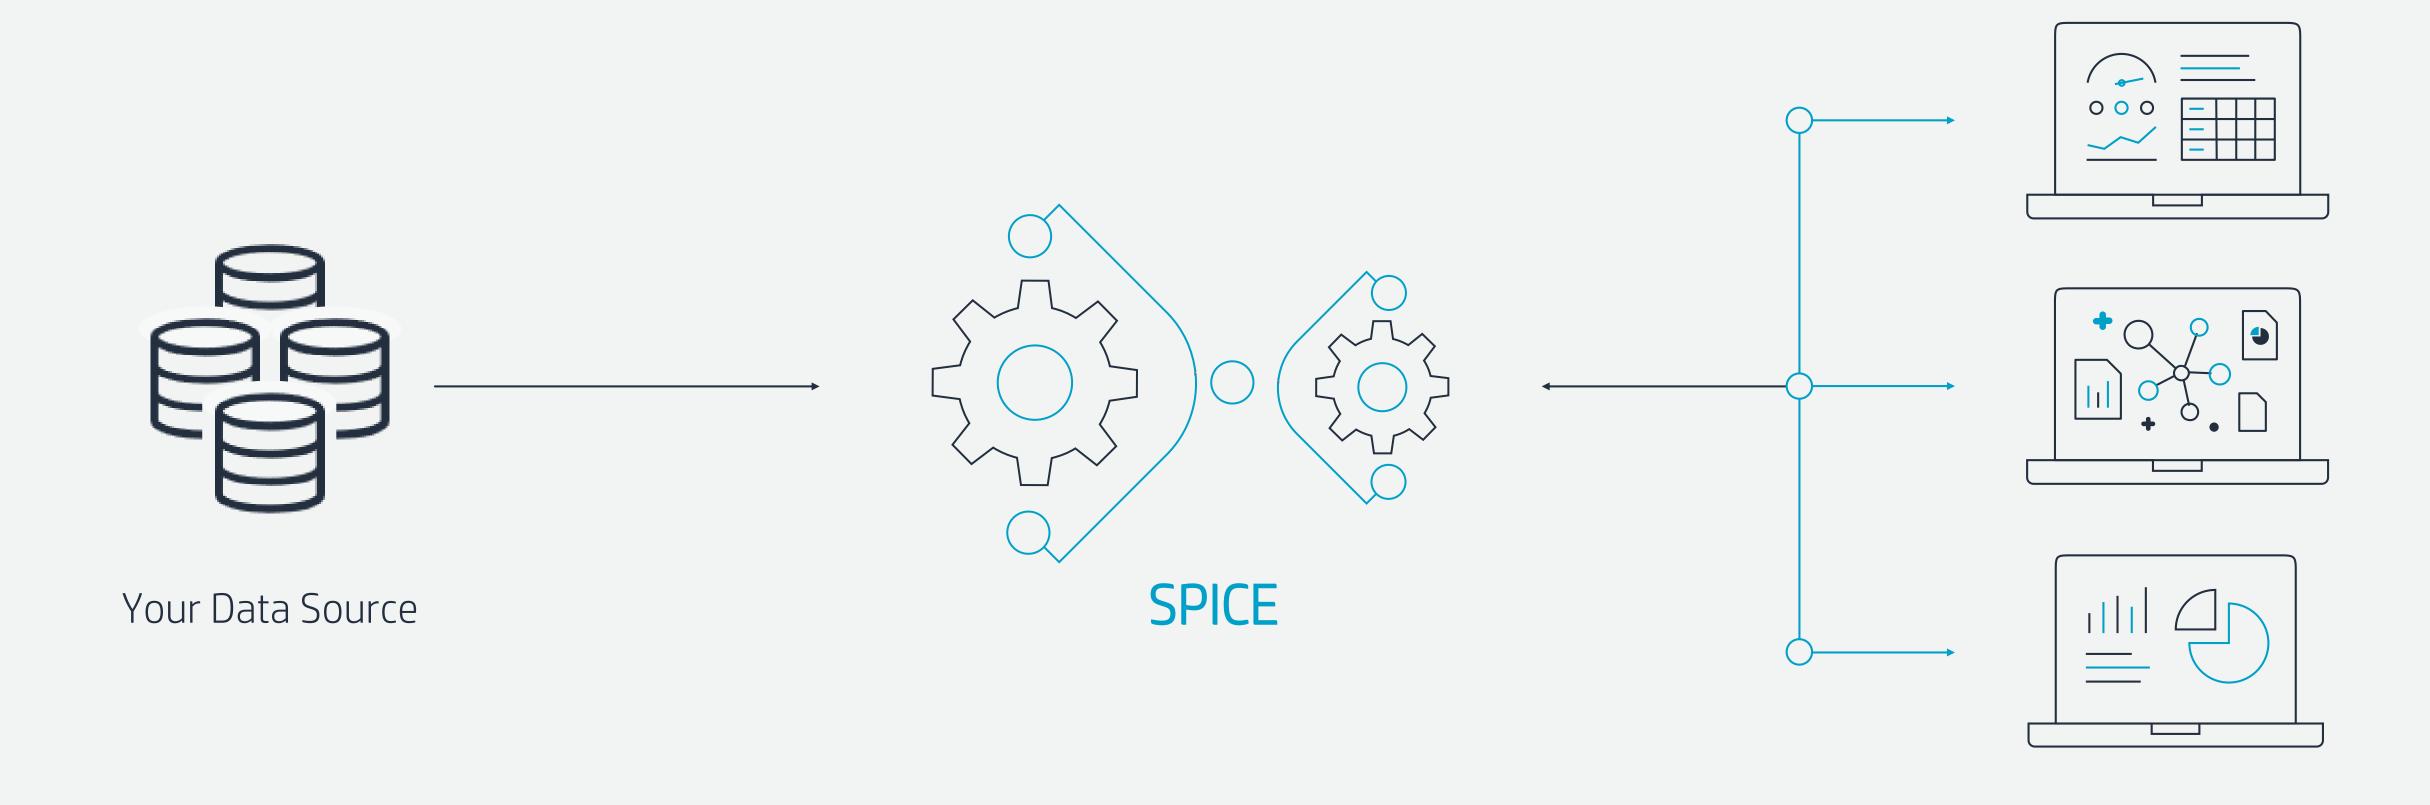

Securely connect to on-premises data

SPICE

QuickSight is powered by SPICE, a super-fast calculation engine that delivers performance and scale, regardless of how many users are active.

Augment your data with Machine Learning

Anomaly Detection

Discover unexpected trends and outliers against millions of business metrics.

Forecasting
Machine learning forecasting
with point and click simplicity.

Auto Narratives
Summarize your business
metrics in plain language.

ML Predictions
Visualize and build predictive dashboards with SageMaker models.
